Dear Friends and Fellow Republicans

Goodbye Fauci

As St. Anthony Fauci prepares to exit the stage, it's a good idea to remind ourselves of the havoc he wreaked on the USA, and on each of us as a person. Fauci is going to try and say that he was doing the best he could under extraordinary circumstances, and that we should thank him for his years of service. Fauci's enablers in the legacy media will try to do this for him.

To the contrary, and it must be remembered, that Mr. Fauci instead presided over the largest health care failure in US history. Fauci, by himself with his at times bizarre and often conflicting pronouncements, helped shut down the US economy, created millions of people who became depressed, suicidal, addicted or re-addicted to drugs or alcohol (sorry but we're not meant to be solitary, humans are social beings).

Fauci helped drug companies profit by forced injections of our children. He also helped create a new cause of death - death by unknown circumstances (aka people dying from negative reactions to the COVID vaccine).

Biden Goes Full On Drill Baby Drill - In Venezuela?

Yes you read me correctly, Biden has stopped drilling for our own oil in the USA, however is allowing Chevron to start drilling for oil in Venezuela. Somehow there is no climate change emergency in the hottest part of the Western Hemisphere, and there is a massive climate change crisis in the USA.

Republican Establishment To Conservative Voters - Drop Dead

Heck even the liberals can see this is happening. Yet the GOP keeps nominating the same brain dead leaders inside Washington DC. Conservatives - we need to fight back to make sure the GOP remains a conservative party, and not Democrat lite. We win when we articulate conservative messages with good conservative candidates.
