Dear Friends and Fellow Republicans

Lessons From a North Korean Defector

Yeonmi Park, a human rights activist who left North Korean years ago, is out there telling the world what we have known for years. That the mind numbing initiation of the Ivy League schools is similar to what occurs in North Korean

words:

“The things that I was learning at Columbia University really shocked me because it was the exact same thing that my North Korean teachers were brainwashing me in the classroom,” Park told host Todd Piro.

“At Columbia University they were literally saying that all the problems that we have is because of capitalism, because of white men, and the solution for all these problems is a communist revolution in the name of equity.” *[Emphasis mine.]*

“They were saying that we need to destroy this country, and we need to rebuild the country in the name of equality of outcomes, and that same ideology drove my home country into what it is that state, North Korea,” she continued.

Then Ms. Park goes onto say (referring to pronouns):

“It’s really funny to this day to me that somehow not having a problem is a problem,” Park said. “They literally create a problem out of nowhere and create injustice out of thin air... Their oppression is that somehow we cannot catch up their ever-growing non-grammatical pronouns, and that’s the biggest oppression they face.”

We have been preaching this for years, but hopefully because of brave people like Ms. Park, some will finally start to listen.

The New Industrial Complex

At the end of his presidency, Dwight Eisenhower spoke about his concern regarding the "military industrial complex". Yet on the subject mentioned above, there is a new industrial complex we should be fearing more. That is the Diversity Industrial Complex. Referring to above, more people are now

both sides of the aisle), the willingness of the establishment of both parties to spend us into ruin. The list of serious problems is ongoing. Yet not to the Diversity Industrial Complex, who - to show that they can accomplish something "meaningful", have infected every section of our lives, from corporate America, to academia, to local/state/federal government - the list goes on.

Diversity - to these rocket scientists, is all about making sure that "white America" is destroyed, and that cultural values are destroyed. That our traditions are destroyed so the collective memory can be filled by something that is not inherently us. People have come to this country for over 200 years to find something else that was not available in their home. From the Scots Irish patriots of the 1600's (who I am descended from), to the Irish immigrants of the 1840's/1850's, to the Italians of the late 1800's and early 1900's, to the Vietnamese/Thai/Cambodians of the 1970's, and to the Ethiopians of the 2000's, people have been coming here and making this country the most diverse in the history of the world. Yet this is not good enough for the whining police, who are trying to rob us of what made us great - so that they can profit and have jobs.

This list also includes Mr. Farouq Massoud, who left Afghanistan in 1962 after renouncing Islam, and was forced by his family to leave his homeland. My father learned English (married his English teacher aka my mother), started his own business - an auto repair shop in 1968, and turned that into what was the 2nd largest fleet of taxicabs in Virginia before COVID. Don't tell me this country doesn't celebrate diversity and the differences in all of us. We've been doing so since our founding. We had black Senators in the late 1860's (Republicans from Mississippi). We've had men and women from all walks of life accomplish great and good things in our history.
