Dear Friends and Fellow Republicans

## **Drill Baby Drill**

A rather fascinating article was written on Real Clear Politics earlier today. One that is a must read. Talks about the truth behind the oil industry, and then the truth behind the environmental nuts and how wrong they are and have been about most everything . Everything from COVID to global warming to Afghanistan, everything these self appointed elites touch turns to (insert whatever word you choose)

Here is part of the article:

**the norm. The amount of time that has elapsed since Col. Drake drilled the first oil well in 1859 is only 163 years. This represents less than .000543 % of modern man's existence on earth. In other words, for 99.999467 % of man's history, man did not harness petroleum products and life absolutely sucked.**

**In just .000543% of modern man's existence, life on earth has improved 1,000 fold. An absolute miracle and an impossibility without the oil and gas industry. Americans should erect giant statues of oil rigs in every town square with inscriptions of adulation venerating the industry's accomplishments and the benefits it has provided humanity. Yet, the absolute stupidest people in the world want to eliminate this fuel source. Unfortunately, moronic people are pretty good at getting elected to office. Dementia Joe and the witless AOC, both stupid on steroids, are now in control of our energy policy.**

Now let's remember that before Ole Joe came into office, we were a net oil exporter. Now we're a net oil importer. And while Ole Joe says that nothing can be done to relieve oil prices - he's lying and we all know he's lying. After all, oil prices jumped the day after Mr. Biden was sworn into office. And they've never stopped rising.

### **Let Them Drink Margarita's - Let Them Drive Teslas**

These self appointed elites really despise us. They never miss a chance to let everyone know how important they all are, and how unimportant each of us is. A few days ago, Energy Secretary Pete Buttigieg said that the best way to reduce our dependence on gas was to all buy electric vehicles.

And when asked about the pain that Americans are feeling - Press Secretary Jen Psaki said that we should all sit back and drink a margarita and relax. Kamala Harris joined in on the fun too.

<https://nypost.com/2022/03/07/kamala-harris-pete-buttigieg-slammed-amid-high-gas-prices/>

Here's one of my favorites - Kamala Harris explaining the Russia Ukraine War.

She comes across as a major league lightweight.

### **More From Our Buddies in The Squad**

This one really needs no explanation - but once again, the radical leftists really can't help themselves. Seems while we're not entitled to police protection,. they spend thousands of taxpayer dollars in private security on themselves.
