Dear Friends and Fellow Republicans

I hope that each of you enjoyed your Thanksgiving holiday - and that you decided to get together with your loved ones, regardless of what Anthony Fauci says. The 1st Amendment gives us a right to gather and to talk to others, no matter what a bunch of self appointed elites say in State or Federal Government.

Many of you may have heard of a new variant of the COVID virus - I'm no doctor or expert, but from what we're hearing from doctors in affected countries, this variant seems to be less serious than the original virus. However we all know that the self appointed elites will try to use this to give themselves more power. Be safe, and be vigilant.

Froma Harrop, a liberal syndicated columnist who writes for many news outlets around the USA, wrote a rather surreal piece in the Northern Virginia Daily last week. In an article titled "Food Inflation is a Turkey of an Issue", Ms. Harrop shows the contempt that she has for average every day working Americans. Saying that the average American will only be paying \$1.26 per pound per person, that means that we should shut up about inflation.

What Ms. Harrop rather conveniently forgets to mention is:

1) Many people who serve Thanksgiving Dinner are seniors for who, an extra few cents is a big deal. Hint to Ms. Harrop and those millions who think like she does - the average person isn't an overpaid underworked narcissist like she is.

2) There are other meals that people eat besides Thanksgiving. This may come as a shock to Ms. Harrop and all others who think in a certain way, but Americans eat meals 3 times a day, 7 days per week, 365 days per year. When a mother feeding a family of 4 has to pay nearly double for the price of ground beef, or see bacon prices double, or a mother/father is now paying \$20 to get to and from work daily instead of \$10 before, and the price of heating ones house is going up, well these things make life tough for us common folk.

This is why - more than ever - each of us has a duty to vote these self appointed establishment hacks out of office - send in good conservatives at all levels of government. But that will not be enough. It is our job, our duty to make sure that our elected officials do the job they say they will do. Eternal vigilance is the price of a free society.

### **The Establishment Wants Us to Suffer - Fauci Version**

Mr. Fauci, ever the narcissist (note that I use this term alot - especially when it comes to self appointed elites), has now decided once again that any attack on him is an attack on science itself. In response to more and more people calling out Mr. Fauci on his record - Washington DC's number 1 Narcissist (and that's saying alot) said these words:

science flavor to this, so if they get up and criticize science, nobody's going to know what they're talking about," Fauci said. "But if they get up and really aim their bullets at Tony Fauci, well people can recognize that there's a person there, so it's easy to criticize, but they're really criticizing science because I represent science."

Fauci basically said "I AM SCIENCE". The man is seriously demented and needs to be removed immediately.
